Freeskate

No stress, no agenda. Just skate around on your own, with your online team or with some friends. You can always make—or get into—trouble later.

Team freeskate is available for players who want to freeskate with their team members.

Online Challenges

Freeskate ends when a challenge is proposed and accepted. Propose one yourself via the online challenge map, or accept a challenge someone else paints on you. When the challenge is finished, players return to freeskate.

Online challenges may differ slightly from their Career counterparts to allow two or more players to share the objectives, either as a team or individually. Either way, owning or killing an online challenge sells boards going towards your Career tally.

Team	Participate in team-based events
Unranked	Compete for bragging rights.
Ranked	Earn board sales, and brag about your place on the leaderboards afterwards.
Career	Shred with a friend and pull down even bigger payoffs by killing challenges together.

skate.Create

Share your talent with the world. Make videos or design the ultimate skatepark… it's up to you and your imagination. Upload your creations directly from the game to skate.ea.com, where other players can browse and download your stuff, earning you board sales for your career. Select CREATE under the pause menu to get started.

skate.Park

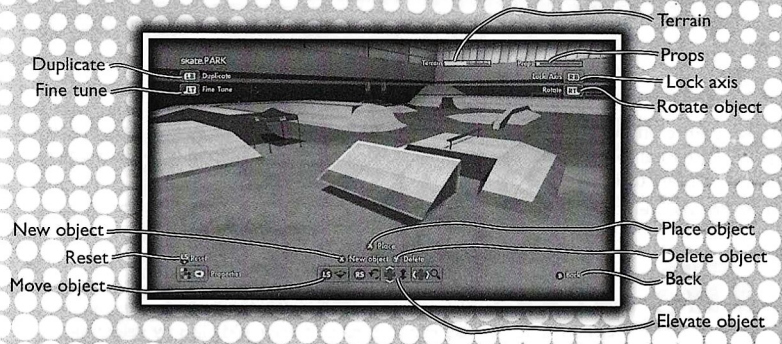
Skaters know what makes a skatepark epic. And once you reach a certain milestone in Career, you get your shot at designing your very own skater nirvana.

The skate.Park editor gives you access to a large, open space just waiting to be made into the ultimate location. You get instant access to a few objects to place wherever you want with the skate.Park editor. More obstacles unlock as you complete more challenges in-game.

When your custom park has achieved perfection, host unranked online freeskate sessions in it. Anything you create can be saved and uploaded to skate.ea.com via the skate.Park browser.

skate.Park Editor

Use the skate.Park editor to spawn in your obstacles and position them the way you want them.



Visit the interactive tutorials from the pause menu for tips on building parks like a pro.

Terrain Pieces

Any stationary geometric surface on which you can skate is a Terrain Piece. But there's no reason they have to obey those pesky laws of physics; terrain pieces can be spawned, oriented, and attached to other terrain pieces, or stuck on walls, or left floating in mid-air. Because gravity is for suckers.

Unlock more skate.Park locations to unlock Vert, Plaza, and Mega terrain pieces. Win unique terrain pieces by completing Own the Spot challenges.
